Canvas element

Attributes

Name Default Type 300 width unsigned long 150 height unsigned long

Methods

Return

Object

Name

toDataURL([Optional] string type, [Variadic] any args) string

getContext(string contextId)

2D Context

Attributes

Type Default Name **HTMLCanvasObject** [readonly] canvas

Methods

Return Name save() void restore() void

Transformation

Methods

Return

void

void

scale(float x, float y) rotate(float angle)

Name

translate(float x, float y) void transform(float m11, float m12, float m21, float m22, float dx, float dy) void setTransform(float m11, float m12, float m21, float m22, float dx, float dy) void

Image drawing

Methods

Return Name

void drawlmage(Object image, float dx, float dy, [Optional] float dw, float dh)

Argument image can be of type HTMLImageElement, HTMLCanvasElement or HTMLVideoElement.

void

drawlmage(Object image, float sx, float sy, float sw, float sh, float dx, float dy, float dw, float dh)

Compositing

Attributes Name

Type globalAlpha float globalCompositeOperation string Supports any of the following values:

destination-over

source-over

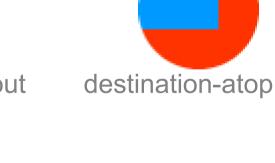

destination-in

source-out

destination-out

Default

1.0

butt

miter

Default

source-over

source-atop

1.0

Line styles

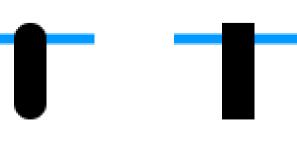

Attributes

Name

lineWidth float **lineCap** string

Type

Supports any of the following values:

string lineJoin Supports any of the following values:

round

butt

round

square

float miterLimit

Colors, styles and shadows

Attributes

Type Default Name black strokeStyle any fillStyle black any shadowOffsetX float 0.0 shadowOffsetY 0.0 float 0.0 float shadowBlur transparent black string shadowColor

Methods

Return Name

CanvasGradient createLinearGradient(float x0, float y0, float x1, float y1)

CanvasGradient createRadialGradient(float x0, float y0, float r0, float x1, float y1, float r1)

10

CanvasPattern createPattern(Object image, string repetition) image is HTMLImageElement or HTMLCanvasElement.

repetition supports any of the following values: repeat (default) repeat-x repeat-y no-repeat

CanvasGradient interface

Return Name

void addColorStop(float offset, string color)

CanvasPattern interface

No attributes or methods.

Paths

Methods

Return Name void beginPath() void closePath() void fill() stroke() void clip() void

moveTo(float x, float y) void lineTo(float x, float y) void

quadraticCurveTo(float cpx, float cpy, float x, float y) void

bezierCurveTo(float cp1x, float cp1y, float cp2x, float cp2y, float x, float y) void

arcTo(float x1, float y1, float x2, float y2, float radius) void

void arc(float x, float y, float radius, float startAngle, float endAngle, boolean

anticlockwise) void rect(float x, float y, float w, float h) isPointInPath(float x, float y) boolean

Text

Attributes

Default Name Type font string 10px sans-serif textAlign string start

Supports any of the following values:

start end left right center

textBaseline string alphabetic

Supports any of the following values:

top hanging middle alphabetic ideographic bottom

Methods

Return Name

fillText(string text, float x, float y, [Optional] float maxWidth) void void strokeText(string text, float x, float y, [Optional] float maxWidth) **TextMetrics** measureText(string text)

TextMetrics interface

Default Name Type width float [readonly]

Rectangles

Methods Return

Name void

clearRect(float x, float y, float w, float h) **fillRect**(*float* **x**, *float* **y**, *float* **w**, *float* **h**) void strokeRect(float x, float y, float w, float h) void

Pixel manipulation

Methods

Return Name

createImageData(float sw, float sh) ImageData ImageData

getImageData(float sx, float sy, float sw, float sh) void

putlmageData(ImageData imagedata, float dx, float dy, [Optional] float dirtyX,

float dirtyY, float dirtyWidth, float dirtyHeight)

ImageData interface

Default Name Type width [readonly] unsigned long [readonly] unsigned long height CanvasPixelArray [readonly] data

CanvasPixelArray interface Name

Default Type unsigned long [readonly] length
